## Mixing paint and other problems: 2

Look at this ratio for making orange paint.

The ratio of yellow parts to red parts can be written as 7:3.
The number of yellow cubes equals 7 and the number of red cubes equals 3 .
The whole mixture is $\frac{7}{10}$ yellow and $\frac{3}{10}$ red.
The information can be put in a table like this:

| Ratio of <br> yellow to red | Number of <br> yellow parts | Number of <br> red parts | Total number <br> of parts | Fraction of <br> yellow parts | Fraction of <br> red parts |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $7: 3$ | 7 | 3 | 10 | $\frac{7}{10}$ | $\frac{3}{10}$ |

Here are different ratios for making orange paint. Match the diagrams to the ratios and complete the table.

| Ratio of <br> yellow to red | Number of <br> yellow parts | Number of <br> red parts | Total number <br> of parts | Fraction of <br> yellow parts | Fraction of <br> red parts |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $2: 7$ |  |  | 9 | $\frac{2}{9}$ |  |
| $1: 2$ |  |  |  |  |  |
| $3: 2$ |  |  |  |  |  |
| $5: 2$ |  |  |  |  |  |
| $3: 5$ |  |  |  |  |  |
