Look at this ratio for making purple paint.

The total number of parts equals six.
The fraction of red parts equals $\frac{6}{9}$.
The fraction of blue parts equals $\frac{5}{6}$.

The ratio of red parts to blue parts is 1:5.

You could record that information in a table, like this:

| Number <br> of parts | Fraction of <br> red parts | Fraction of <br> blue parts | Number of <br> red parts | Number of <br> blue parts | Ratio of <br> red to blue |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 6 | $\frac{1}{6}$ | $\frac{5}{6}$ | 1 | 5 | $1: 5$ |

Here are different ratios for making purple paint. Match the diagrams to the ratios and complete the table.

| Number <br> of parts | Fraction of <br> red parts | Fraction of <br> blue parts | Number of <br> red parts | Number of <br> blue parts | Ratio of <br> red to blue |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 15 | $\frac{4}{5}$ |  |  |  |  |
| 20 |  | $\frac{3}{5}$ |  | 18 |  |
| 24 | $\frac{2}{3}$ |  |  | 9 |  |
|  |  | $\frac{4}{9}$ | 10 |  |  |
|  |  |  |  |  |  |
